INDEX

For Volume 65

INDEX FOR VOLUME 65

AUTHOR AND SUBJECT INDEX. Junior authorship is indicated by page numbers in parentheses. Page numbers of illustrations are in boldface. Pages of errata are in double parentheses. A special listing is made of "new diseases, species, and varieties."

Abawi, G. S., (122), 300, (657), 673
Abelia grandiflora, tymovirus of, purification and properties of, 891, **893**
Adams, P. B., (871)
Adeniji, M. O., 722
aerobiology
Fusarium spp. in air inside and outside greenhouses, 575
spores above Kansas wheat field, 490
aflatoxin (see **toxin**)
Agallia constricta, vector for corn viruses, carbofuran effect on, 1017
Agaricus bisporus, Verticillium malthousei on, fungicides for, 637
Agrios, G. N., (707)
Agrobacterium tumefaciens
on carrot
crown gall caused by, gravity compensation, 931, **932-935**
isozyme patterns in gravity-compensated tissues, 1136
on chrysanthemum, leaf, stem, and root galls induced by, 805, **806**, **807**, **809**
Agrostis tenuis, Bipolaris sorokiniana pathogenic to, 398
air pollution (see **pollution**, air-)
Albizia julibrissin
Fusarium oxysporum perniciosum on, 188, **189**
Fusarium wilt of, benomyl and thiabendazole for, 504
Alconero, R., 769
Aldwinckle, H. S., 958, 989
Alexander, S. A., 585
alfalfa
downy mildew of, nonhaustorial hyphae in, 638, **639**
Phytophthora megasperma on
cotyledons of, resistance to, 365, **366**
resistance to lines of, 840, **843**
survival and activity in soil, 1267
snow mold, antagonism between isolates of unidentified basidiomycete, 877, **878**
alfalfa mosaic virus, aggregation forms of, variation in organs of, 1249, **1251**, **1252**
Alfieri, S. A., Jr., (331)
All, J. N., (1017)
Allescheria sp., on alder, poplar, and pine wood, chemical changes caused by, 473
Allium cepa (see **onion**)
almont (see **Prunus** amygdalus)
Alnus rubra, soft-rot fungi on, effect on chemical composition of wood, 473
Alternaria spp.
alternariols from, on weathered sorghum grain, 1259
on tobacco leaves, endophyte role, 417, **419**
alternata
on tobacco, postinoculation leaf wetness related to, 897, **898**
on tomato, occurrence and factors affecting severity, 1352
alternata lycopersici, on tomato, stem canker disease from, 880, **881**, **882**
mali, host-specific toxin isolated from cultures of, 82
porri solani, on potatoes, sporulation of, wet-dry regimes, 532
solani
on potato, resistance related to glycoalkaloid content, 1045
spore germination in, temperature effects on, 551
tenuis
spore release factors, 1303
tentoxin crystallized and purified from, 495
American Phytopathological Society
Campbell award, 747
fellow, 748
Northeastern division abstracts, 835
Potomac division abstracts, 836
Ruth Allen award, 748
Amin, K. S., 214, (1029)
aminopeptidase (see **enzymes**, specific)
Ammophila breviligulata, Marasmiellus mesosporus on, resistance to, 690
Ananas comosus (see **pineapple**)
Andean potato latent virus, tymovirus from Abelia related to, 891
anthracnose, northern- (see **Kabatiella caulivora**)
antibiotics
cotton necrosis induction by, 206, **207**, **208**
penicillin, movement in soybean seeds, dichloromethane vehicle for, 1319
tetracyclines, use for mycoplasmalike organisms in peach rosette, 864
Aphis craccivora and gossypii, vector for pepper virus, possibly polyvirus group, 1329
Apium graveolens (see **celery**)
apple
collar rot of, use of safflower seedlings to detect pathogen in soil, 1424, **1426**
Erwinia amylovora on, population monitored in relation to disease, 1009
European apple canker of, epidemiology in Calif., 542
Gymnosporangium juniperi-virginianae on, pathogenic races of, 958
Phytophthora cactorum on, pathogenicity of isolates to, 989
scar skin disease of, histopathology, 707, **708**, **710-712**
sieve tubes of, tubular structures in, 660, **662**
apricot, Cytosporina dieback of, pruning wounds related to, 1359
arabis mosaic virus, on jasmine, purification of, 927
Arachis hypogaea (see **peanut**)
Aragaki, M., (280)
Ascochyta chrysanthemi, toxin from, purification and characterization, 912
aspartate transcarbamylase (see **enzymes**, specific)
Aspergillus
flavus
on cotton, boll infection affected by temperature cycles, 1043
on cottonseed, postharvest infection by, 1229, **1230**
in soil and media, recovery of, 704

niger, on cottonseed, postharvest infection by, 1229, **1230**
Atif, A. H., 318
atrazine (see **herbicide**)
Auger, J. G., 493
Avena sativa (see **oats**)
avocado (see **Persea americana**)
Ayanaba, A., (217)
Ayers, J. E., 835, (835)
Ayers, W. A., (871), 1094, (1101)

Baba, T., (1263)
Bacillus subtilis, biocontrol agent for corn root disease, 296
Backman, P. A., 773, 819
bacteria (see also under specific genera)
ecology, survival in tropical soil, 513
liquid N storage for, methods, 246
pathogens on humans, plants as carriers of, 425
population in lettuce leaves and soil, 509
soft rot-, bottom rot of lettuce associated with, 16
Bailey, D. L., (1419)
Bakarcic, M., (476)
Baker, B. L., (931), (1136)
Baker, R., (931), (1136)
Bandong, J. M., (1315)
Banihashemi, Z., 1212, (1424)
Banttari, E. E., (464)
Bar-Joseph, M., 640
Barkai-Golan, R., (216)
barley
dwarf bunt of, susceptibility to, 654, **655**
Fusarium oxysporum vasinfectum on, as nonhost, 190
net blotch of, resistance factors affecting, 464
powdery mildew of, haustoria and papillae formation in, 310, **311**
barley stripe mosaic virus
epidemiology, in Calif., 1218
seed-borne, serological detection of, 948
barley yellow dwarf virus
dependent aphid transmission of, 99
vector specificity in, source leaf effects on, 1024
Barnett, R. D., (631)
Bartz, J. A., 1146
Basham, H. G., 141
Bashi, E., 532
Batchelor, D. L., (1202)
Bateman, D. F., (141), (797), (912)
Batson, W. E., (431)
bean (see **Phaseolus** vulgaris and under genera of)
bean common mosaic virus, bean yield reduced by, nature of, 1342
Bean, G., (836)
bean yellow mosaic virus, bean yield reduced by, nature of, 1342
bean yellow stipple virus, cowpea chlorotic mottle virus related to, 741
beet (see **sugarbeet**)
beet mild yellowing virus, beet western yellows virus related to serologically, 811
beet western yellows virus, beet mild yellowing virus related to serologically, 811
Ben-Arie, R., 1187
Benner, H. I., (334)
benomyl (see **fungicides**, specific)
Ben-Yephet, Y., 563, 936
benzimidazole (see **fungicides**, specific)
Berger, R. D., 485
Bergquist, S. E., (310)
Beta vulgaris (see *sugarbeet*)
Betula alba, Botryosphaeria dothidea on, stress effect on, 369
Beute, M. K., (393), (422), (649)
biological control
agents of, system for growth and delivery in soil, 819
bacterial blight of soybean seedlings, antagonistic bacterium for, 844
corn to root rot, antagonists in field, 296
ergot by Fusarium roseum 'Sambucinum,' 5
for Meloidogyne incognita, soil amendment effect on egg hatch, 1178
mycorrhizal fungus for Fusarium root rot on Douglas-fir seedlings, 468
Sclerotium rolfsii on peanut, Trichoderma for, evidence from fungicide study, 773
Verticillium wilt of mint by V. nigrescens, 767
Bipolaris
maydis (see also **Helminthosporium** maydis)
races O and T, temperature effects on symptoms in corn, 623
sacchari, on sugarcane, resistance to, field screening method, 955
sorokiniana, on grass roots and seeds, pathogenicity of, 398
black point, on durum wheat, inheritance of resistance to, 627
blueberry (see **Vaccinium** corymbosum)
bluegrass (see **Poa pratensis**)
Boosalis, M. G., (250), (1021)
Boothroyd, C. W., (1075)
boron, on papaya, deficiency related to deformed-fruit disease, 445, **446**
Botryosphaeria dothidea
on almond, Hendersonula toruloidea related to, 114, **116**, **117**
on birch, stress effect on susceptibility, 368
Botryotinia fuckeliana
on bean, occurrence and biology in N.Y., 657, **658**
benzimidazole-resistant mutant from, 902
Botrytis cinerea
on bean, occurrence and biology in N.Y., 657, **658**
on onion, role of phenols in stain from, 338
bottom rot, on lettuce, microorganisms associated with, 16, **17**, **19**
Braun, A. L., 328
Bremia lactucae, on lettuce, resistance to, races, 243
Brennan, E., (666), 1054, (1239)
Brevicoryne brassicae, pea enation mosaic virus not transmitted by, 496
Brinkerhoff, L. A., (206)
Bromfield, K. R., (822), (828)
Brown, G. E., 404
Brown, J. F., (1404)
Brown, M. F., (74)
Brown, R. G., (1350)
Browning, J. A., (1400)
Bruehl, G. W., 755, 1108
Buchanan, B. B., (361), (777)
Buchenau, G. W., 1317
Buddenhagen, I. W., (513)
Bugbee, W. M., (926)
Burke, D. W., (519)
Burroughs, R., (1259)
Busch, R. H., (627)
Bushnell, W. R., 310

cabbage, Xanthomonas campestris on, detection in seed, 1034
cactus, TMV on, strain of, **824**
cadang-cadang disease, on coconut palm, 2 RNA spp. associated with, 163
Cajanus cajan, Phytophthora stem blight of, symptoms and pathogenesis of, 1029, **1030**

Calavan, E. C., (1143)
Calonectria crotalaria (see also **Cylindrocladium** crotalariae)
ascospore formation and discharge by, 393, **394**, **396**
in soil, method of enumeration and isolation, 1036
Capsicum
annuum
new virus of, possibly potyvirus, in Nigeria, 1329, **1330**, **1331**
pepper mottle virus of, aphid transmission in, 110
Xanthomonas vesicatoria on leaves of, cell concentration effect on, 487
frutescens
capsidiol induction in
during incompatible reaction with Phytophthora, 1286
fruit of, related to Phytophthora and Monilinia interaction, 1417
Phytophthora infestans on, ultrastructural host cell changes in incompatible reactions, 1274, **1276–1278**, **1280**, **1282**
Phytophthora and Monilina on, ultrastructural changes from interactions, 1409, **1410–1412**, **1414**
captan (see **fungicides**, specific)
carboxin (see **fungicides**, specific)
Carica papaya
deformed-fruit disease, boron deficiency relation, 445, **446**
Phytophthora palmivora on, propagule density in soil effect, 780
Carlson, R. V., (246)
carnation, Fusarium stub dieback of, symptoms, 575, **576**, **577**
Carpophilus mutilatus, vector for Monilinia fructicola on stone fruits, 977, **978**
carrot
crown gall of
isozyme patterns in gravity-compensated tissues, 1136
response to gravity compensation, 931, **932–935**
Carthamus tinctorius (see **safflower**)
Carya illinoensis (see **pecan**)
cassava (see **Manihot esculenta**)
cassava mosaic disease, elimination by meristem culture, 826, **827**
Castor, L. L., 835
celery, Cercospora apii on, disease related to plant spacing, 485
Cephalosporium
gramineum
in soil, populations under winter wheat, 1129
on wheat, infection process and host response, 1244
gregatum, on soybean, toxin production by, 89
Ceratocystis
fagacearum, on red oak, system for studying, 1381, **1382**, **1383**
ulmi
cytology and ultrastructure of, 816, **817**, **818**
on elm, resistance to, anatomical marker for, 349, **350**
infection localized in resistant elms, 129
inhibition of, by elm seed agent, 634
resistance of elm to, conductivity relation, 643
Cercospora sp., spore release factors, 1303
apii, on celery, disease related to plant spacing, 485
arachidicola, on peanut, fungicides for, 773
beticola
benomyl-tolerant strain of, 734
on sugarbeet, benomyl tolerance to, 785
canescens, spore germination inhibited by cowpea leaf diffusates, 63
Cercosporidium personatum, on peanut, fungicides for, 773
cereal, powdery mildew epidemics on, relation to wild grasses, 57
Chaetomium globosum, biocontrol for corn root disease, 296
Chalutz, E., (630)
Chamberlain, D. W., (89)
Chapman, S. R., 409
charcoal rot (see **Macrophomina phaseolina**)
chemotherapy, in peace rosette disease, antibiotics for, 864
Chenopodium quinoa, potato virus S on, factors affecting bioassay of, 1288, **1289**
Chessin, M., (824)
chloro-methoxy-(trichloromethyl) pyridine (see **fungicides**, specific)
Chrysanthemum
maximum, bacterial fasciation of, epidemiology factors, 719, **720**
morifolium, Ascochyta chrysanthemi on, toxin produced by, purification, 912
chrysanthemum chlorotic mottle viroid, agent protecting against, detection of, 1000
chrysanthemum wild mottle virus, antibodies from cucumber mosaic virus antisera specific to, 65
Cho, J. J., (380), 425
Christie, S. R., (1202)
Cicer arietinum, phytoalexins isolated from germinating seeds of, 91
citrus
Colletotrichum gloeosporioides on, factors affecting postharvest development of, 404, **405**
Diplodia natalensis on oranges, respiration changes, 216
leaf-rugose virus of, purification, properties, serology, 50, **52**
Citrus spp., Phytophthora spp. on, factors affecting, 241
jambhiri, scab of, biology of Elsinoe fawcetti, 1170
sinensis, Penicillium spp. related to thiabendazole treatment, 498
Civerolo, E. L., 258
Cladosporium fulvum, spore release factors, 1303
Clark, C. A., 338
Claviceps purpurea
ascocarps prevented by chemicals, 502
Fusarium roseum parasitic to, 5
honeydew stage colonized by Fusarium heterosporum, 1372
on Triticale, detection method for, 455
Clerodendrum ringspot virus, tobacco ringspot virus identical to, 1150, **1151**, **1152**
Clerodendrum thomsoniae, tobacco ringspot virus of, identification, 1150, **1151**, **1152**
Cochliobolus
heterostrophus (see **Helminthosporium** maydis)
sativus, genetics in, 699, **700**, **701**
coconut, cadang-cadang disease of, 2 RNA spp. associated with, 163
Cohen J., 32
Cohen, S., (479)
Cohen, Y., 1313
Cole, A. W., 431
Cole, H., Jr., (345), (836)
Colletotrichum
gloeosporioides
on avocados, factors affecting in storage, 458
on citrus, factors affecting postharvest development in, 404, **405**
graminicola, on corn, symptoms, 620, **621**
Comstock, J. C., 616
Contreras, M. R., 1075
Cook, A. A., 487
Cook, G. E., 250

copper sulfate (see **fungicides,** specific)
Coriolus versicolor, on white spruce, wounding relation to oleoresin and lignans in, 412
corn
bacterial disease of, computerized forecasting system for, 835
Bipolaris maydis on, races O and T, temperature effects on symptoms, 623
Colletotrichum graminicola on, prevalence on kernels, 620, **621**
extract from, effect on soft rot Erwinia spp., 1082
Fusarium moniliforme on, maternal influence of, 223
Fusarium root rot of, atrazine effect on severity of, 154
Helminthosporium on, resistance to race O of, hererosis in, 117
Helminthosporium maydis on
effect on epidermal nuclei, 1075
monogenic chlorotic-lesion resistance in, 1160
Helminthosporium maydis race T on
diallel analysis in 8 inbreds of, 10
nuclear restorer gene effect, 178, **179**
toxins in leaves, 616
Helminthosporium turcicum on, relation to monogenic resistance, 735
maize dwarf mosaic virus of, water relation effects on, 434, **439**
Phyllosticta maydis on, spore germination and infection, 835
rust epidemics on, cropping practice and genetic homogeneity associated with, 1040
Setosphaeria turcica on, genetics of pathogenicity, 280
Coronilla varia, peanut stunt virus on, 321
Cortés-Monllor, A., (401)
Corticium bicolor, octadecadienoic acid from, 836
Corynebacterium
fascians
on chrysanthemum, epidemiology factors, 719, **720**
on pea, fasciation caused by, 1114, **1115, 1116**
michiganense
on tomato
calcium nutrition effect on, 84
Meloidogyne incognita interaction with, 1332
cotton
boll infection by Aspergillus flavus, temperature cycle effect on infection, 1043
boll rot of, control measures evaluated in, 567
necrosis induction in, role of antibiotics, 206, **207, 208**
seed infected by fungi, after harvest, 1229, 230
Verticillium and Fusarium on, endopolygalacturonases from, role in peroxidase activity in cell walls, 830
cowpea (see **Vigna** unguiculate)
cowpea chlorotic mottle virus, yellow stipple virus related to, on bean, 741
cowpea mosaic virus, aspartate transcarbamylase activity in, 1079
Crawford, J. L., (567)
Criconemoides xanoplax
on peach, soil fumigation for, 277
on plum, relation to
bacterial canker, 556, **558**
Paratylenchus neoamblycephalus, 328
Crill, J. P., (1146)
Crill, P., (647)
Crist, C. R., 369
Cronartium
fusiforme
on pine
pathogenicity vs. inoculum source, 170
resistance in selections of, 336
ribicola
basidiospores of, germination and differentiation, 1061, **1063, 1064, 1066**
on Pinus monticola, effect on sugar in bark, 1025
on white pine, electron microscopy of, 681, **683, 684**
crown gall, on carrot, gravity compensation of tissue growth, 931, **932-935**
Cruciferae, benomyl toxicity to, 535
cucumber
Erwinia carotovora on fruit of, populations in, 670, **671**
tobacco mosaic virus of, electron microscopy of starch lesions in, 32, **33-38**
cucumber mosaic virus
antibodies from antisera of, specific for peanut stunt and chrysanthemum mild mottle viruses, 65
on melon, inheritance of resistance to, 479
related virus from Ixora plants, **728**
Cucumis melo
Fusarium oxysporum melonis on, role of host and nonhost roots, 1212
squash mosaic virus strains in, cross-protection, 837
Cucurbita pepo, squash mosaic virus strains in, cross-protection, 837
Cunfer, B. M., (755), 1372
Curculio caryae, on pecan, control affecting pecan mycoflora, 1393
curly top virus, on tomato, sulfate uptake and translocation in, 77
Currier, W. W., 1194
Cylindrocladium
crotalariae (see also **Calonectria crotalariae**)
on peanut
histopathology of, 649, **650, 652**
variability in virulence of isolates in, 422, **423**
heptaseptatum, on Polystichum adiantiforme, from Honduras, 331, **332, 333**
pteridis, quinqueseptatum and theae, on Polystichum adiantiforme, 331
Cynodon dactylon, mycoplasmalike organisms associated with, **640**

Daly, J. M., (1139)
Darling, H. M., (749)
Daucus carota sativa (see **carrot**)
Davis, D. D., (645)
Davis, J. R., (114)
Dean, J. L., 955
Decker, P., 363
de Moura, R. M., 1332
Demski, J. W., 95, 917, 1154
DeVay, J. E., (114)
Dewey, W. G., 654
Dexon (see **fungicides,** specific)
de Zoeten, G. A., 221
Dhingra, O. D., 326
Diaporthe
phaseolorum sojae, on soybean, fungicides for, 553
viccinii, on blueberry, etiology and symptomatology on, 105, **108**
Dinoor, A., (563), (936)
Dinus, R. J., (170)
diphenamid (see **fungicides,** specific)
Diplodia natalensis, on orange fruit, respiration and ethylene evolution induced by, 216
Dithane M-45 (see **fungicides,** specific)
Doskotch, R. W., 634
Doupnik, B., Jr., 1021
Douthit, L. B., 134
Dow, R. L., (871)
Dowler, W. M., 233, (277)
Dowley, L. J., 1422

Drechslera turcica (see also **Helminthosporium** turcium)
spore release by, effect of relative humidity and radiation, 1303
Dubin, H. J., 542
Duffus, J. E., (243), (361), 811
Duniway, J. M., 886, 1089
Dunkle, L. D., 1321
Dunleavy, J. M., (686)
Durbin, R. D., (1381)
Dutch elm disease (see **Ceratocystis** ulmi)
Dutky, R., (836)

Easton, G. D., 1419
Echandi, E., (84), (1332)
Edgington, L. V., (1254)
Edwards, D. I., (722)
Effland, M. J., (473)
eggplant mosaic virus, tymovirus from Abelia related to, 891
electron microscopy (see also **ultrastructure**)
alfalfa mosaic virus, in alfalfa parenchyma, 1249, **1251**, **1252**
apple leaf tube to, tubular structures of, 660, **662**
Beavertail cactus virus, strain of TMV, on cactus, **824**
Ceratocystis ulmi, cytology and ultrastructure of, 816, **817**, **818**
citrus-leaf-rugose virus, 50, **52**
Clerodendrum ringspot virus, 1150, **1152**
Cronartium ribicola on pine, 681, **683**, **684**
cucumber mosaic-like virus on Ixora plants, **728**
little-cherry disease of Prunus spp., flexuous rods and vesicles in phloem of, 1181, **1183**, **1184**
mycoplasmalike organism on Bermudagrass, **640**
Nectria galligena, 542, **546**
peach rosette, mycoplasmalike organisms associated with, 864, **867**, **869**
penyakit habang disease on rice, in Indonesia, 793, **794**, **795**
pepper mottle virus, 559, **560**
pepper virus, possibly polyvirus, in Nigeria, 1329, **1331**
Peronospora trifoliorum hyphal wall ingrowths, 638, **639**
ratoon stunting disease in sudangrass, 287, **288-194**
rhizobial root nodule of soybean, 447, **449**, **450**, **452**, **453**
scanning-, for fungal structures in plant cells, 74, **75**
soil-borne wheat mosaic virus, biological functions of short and long particles in, 523, **529**
Typhula incarnata on wheat, 755, **757**
Ellis, M. A., 553, (1319), 1387
elm
antifungal agent from seeds of, identification, 634
Ceratocystis ulmi on
anatomical marker for resistance to, 349, **350**
resistance related to conductivity, 643
Dutch elm disease of, resistance to localized infection, 129
Elsinoe fawcetti, on sour orange, biology of, 1170, **1172**
Elymus cinerus, stripe rust of, inheritance of resistance to, 409
Emge, R. G., 679
Endo, R. M., (726)
Endogone sp., scanning microscopy arbuscules, 74, **75**
fasciculata (see **Glomus fasciculatus**)
endopectate lyase (see **enzymes**, specific)
endophytes, on Nicotiana spp., characterization of on leaves, 417, **419**
endopolygalacturonase (see **enzymes**, specific)
English, H., 114, (542), (1362)
enzymes (general) (see also **enzymes**, specific)
pectolytic maceration of potato tissue, by Pseudomonas spp., 921
in wheat, result of powdery mildew, 1071
enzymes (specific) (see also **enzymes**, general)
aminopeptidase, profiles in Erwinia isolates, 1206
aspartate transcarbamylase, on virus-infected cowpea and soybean leaves, 1079
endopectate lyase, relation to cell death, 141
endopolygalacturonase, from Fusarium and Verticillium, activity in cotton cell walls, 830
pectate depolymerase, relation to cell death, 141
peroxidase
effect on bactericidal activity of phenolics, 686
solubilization by endopolygalacturonase, in cotton cell walls, 830
polygalacturonase, relation to cell death, 141
epidemiology
air-spora above wheat fields, 490
Alternaria on tobacco, leaf wetness effect, 897
apple canker (European) in Calif., 542
bacterial blight of field beans, estimation from aerial photographs, 961, **963**
barley stripe mosaic virus, in Calif., 1218
bean to Whetzelinia sclerotiorum, 300, **302-304**
water potential effects, 122
blueberry to mummy berry disease, 229
Cephalosporium gramineum, population in winter wheat soil, 1129
citrus brown rot, 241
Corynebacterium fascians on chrysanthemum, factors affecting, 719, **720**
crown rust of oats, 1404
factors affecting infection structures of, 1400
Eutypa armeniacae on apricot, ascospore production and dispersal, 1364, 1370
peach leaves to Xanthomonas pruni, quantitative aspects, 258
peanut mottle virus on soybean and peanut, 917
pear fire blight, weather and epiphytic populations in, 353
Phytophthora palmivora on papaya, propagule density in, 780
potato to Alternaria and potato to Stemphylium, wet-dry regimes for, 532
powdery mildew on grasses and grains, 57
Rhizoctonia solani in soil, 871
rust vs. curly top agent on sugarbeet, 361
sour orange scab, biology of pathogen, 1170, **1172**
stem and leaf rust of wheat, progress curve related to yield loss, 1317
stem rust of oats, 1404
sunflower downy mildew, biotic and climatic factors affecting, 751
tomato to late blight, ontogenetic predisposition to, 1422
wheat to Septoria leaf blotch, 761
wheat to stripe rust, role of sporulating zone, 679
wheat spindle streak mosaic virus, seasonal transmission of, 1133
Whetzelinia sclerotiorum on bean seed, significance, 1323
ergot (see **Claviceps purpurea**)

fumigants
dibromo-chloropropane, for nematode control on peach, 277
methyl bromide, pecan weevil control related to pecan mycoflora, 1393
fungicides (general) (see also **fungicides,** specific)
on foliage, efficacy and weatherability of, method for determining, 1023
mummy berry disease of highbush blueberry, 229
protectant, systemic, applied to sclerotia, 502
systemic, for black shank of tobacco, 22, **24, 25**
use with polygenic resistance in potato late blight control, 908
fungicides (specific) (see also **fungicides,** general)
benomyl
bean chloroplast ultrastructure affected by, 345
Cercospora beticola tolerant strains to, 734, 785
for Colletotrichum seedling blight and wilt of corn, 620
on cowpea, increases Pythium stem rot, 217
on crucifers, phytotoxicity to, 535
detection and translocation in postharvest-treated peaches and nectarines, 255, ((648))
effect on Penicillium digitatum, 1176
for Fusarium wilt of mimosa, 504
postharvest application in pear, 1187
for Pythium blight on creeping bentgrass, 836
rust haustoria ultrastructure affected by, 388, **390, 391**
in soil, microbial interaction with, 219
on soybean leaves, movement of benzimidazole-carbamate into seeds, 1387
soybean seed-borne fungi affected by, 553
Ustilago hordei tolerant to, inheritance of, 563
Verticillium malthousei tolerant to, 637
vs. leafspot of peanut, effect on nontarget pathogen of, 773
benzimidazole
Botryotinia fuckeliana mutant resistant to, 902
cowpea, Pythium stem rot increased by, 217
relation to membranes in ozonated bean, 39
captan
biocontrol compared with on corn, 296
for Colletotrichum seedling blight and wilt of corn, 620
cotton boll rot controlled by, 567
soybean seed-borne fungi affected by, 553
carboxin
smut strains sensitive to, 936
Ustilago hordei tolerant to, inheritance of, 563
chloro-methoxy-(trichloromethyl) pyridine
rhododendron and soybean root rot controlled by, 69
on tobacco, for black shank control, 22, **24, 25**
copper sulfate, citrus brown rot controlled by, 241
Dexon, rhododendron and soybean root rot controlled by, 69
diphenamid, Rhizoctonia and Pythium affected by, in culture and damping-off ot tomato, 431
Dithane M-45, for potato late blight control with polygenic resistance, 908
ethazole, rhododendron and soybean root rot controlled by, 69
methyl 2-benzimidazolecarbamate, uptake by onion roots, 1254, **1256**
oxycarboxin, rust haustoria ultrastructure affected by, 388, **390, 391**
PCNB, for Colletotrichum seedling blight and wilt of corn, 620
sodium o-phenylphenate, effect on Penicillium digitatum, 1176
thiabendazole
effect on Penicillium digitatum, 1176
for Fusarium wilt of mimosa, 504
postharvest application in pear, 1187
thiram, soybean seed-borne fungi affected by, 553
zineb, Verticillium malthousei sensitive to, 637
fungistasis, in soil, charcoal use in evaluation of, 1031
Fusarium
heterosporum, Ergot honeydew colonized by, 1372
moniliforme
on corn, maternal influence of, 223
on sorghum, stalk rot reduced by ecofallow, 1021
oxysporum
on Douglas fir, seedling blight from, protection by mycorrhizae, 468
on Plantago ovata, symptoms and etiology, **359**
oxysporum gladioli, on gladiolus, evaluation of resistance

to, 481, **482**
oxysporum lilii, chlamydospore germination in, stimulation by pine needle acids, 1120
oxysporum lycopersici
on cotton, peroxidase activity in cell walls, role of polygalacturonases, 830
tobacco cyst nematode relation to, on tomato, 81
on tomato
antifungal activity of extracts from infected plants, 93
technique for identifying clones of, 726, **727**
oxysporum f. sp. melonis
roots, 1212
oxysporum perniciosum
on mimosa, benomyl and thiabendazole for, 504
on mimosa trees, 188, **189**
oxysporum vasinfectum, in soil, persistence without cotton, 190
roseum 'Avenaceum', in PVX-infected potato, enzymatic cell wall degradation by, 797
roseum 'Culmorum', on corn, atrazine effect on, 154
roseum 'Graminearum'
on carnation, dieback caused by, symptoms, 575, **576**, **577**
on corn, biocontrol for, 296
roseum 'Sambucinum', biological control agent for ergot, 5
solani
on peanut
interaction with fungi-causing pod rot, 1375
synergistic reaction with Pythium myriotylum and Meloidogyne arenaria, 832
solani phaseoli, on bean, root rot affected by soil aeration, 519, **521**
solani pisi, on peas, atrazine effect on root rot from, 154
Fusicoccum putrefaciens, on blueberry, canker-dieback disease from, 105

potato
to several diseases, relation to glycoalkaloid content, 1045
to Verticillium wilt, 225
rice to blast, qualitative and quantitative factors, 1315
Solanum phureja to bacterial wilt, role of antibacterial compound, 1336
soybean to peanut mottle virus, 95
sugarcane
to Bipolaris sacchari, field selection of, 955
to ratoon stunting disease, 138
tobacco
to powdery mildew, induction by Peronospora, 1313
to Thielaviopsis basicola, chlorogenic acid relations, 1049
tomato
to bacterial soft rot, 1146
to Pseudomonas solanacearum, breakdown of, 1272
to stem canker, 880, **881**
wheat
to black point, 627
to Septoria tritici, 761
to stem rust
leaf detachment effect on, 1139
response of detached tissues, 318
wheat and triticales to Phoma glomerata, effect of wet period on, 1236
wildrye to stripe rust, 409
Reuveni, M., (1313)
Reyes, A. A., 535
Rhizobium japonicum, on soybean, electron microscopy of nodules by, 447, **449**, **450**, **452**, **453**
Rhizoctonia solani (see also **Thanatephorus cucumeris**)
on lettuce, bottom rot caused by, microorganisms

associated with, 16, **17**, **19**
lima bean resistance to, inoculum effects, 341
on okra and tomato, disease complex with nematodes, 265, **267**, **268**, **270**
on peanut, interaction with fungi-causing pod rot, 1375
on rice
developmental changes in sclerotia of, 159, **160**, **161**
sheath blight caused by, 214, **215**
in soil, ecology and epidemiology of, 871
on tomato, diphenamid effect on, 431
Rhizopus
arrhizus, on cottonseed, postharvest infection in, 1229, **1230**
stolonifer, polygalacturonase produced by, 141
Rhoads, A., 1239
rhododendron, Phytophthora root rot of, chemical control for, 69
Rhopalosiphum
maidis, vector for barley yellow dwarf virus, 99
padi, pea enation mosaic virus transmitted by, 496
Ribeiro, O. K., (592), 904
rice
blast, quantitative and qualitative resistance to, 1315
penyakit habang disease of, in Indonesia, bacilliform particles in, 793, **794**, **795**
Sclerotium oryzae on
fungistasis in sclerotia of, 283
genetics of resistance to, 968
virulence and fitness related to sporulation, sclerotium production, and growth rate, 972
seed pathogens on, detection methods, 1325
sheath blight of
evaluation method for, 214
sclerotial developmental changes in, 159, **160**, **161**
straighthead disease of, H_2S effect on physiology of, 1165
Xanthomonas oryzae on
seed transmission of, 663
survival in soil, factors affecting, 513
Richardson, L. T., 833
rickettsia, plum leaf scald disease associated with, 476, **477**
Rippon, L. E., (1176)
Robbers, J. E., 455
Rochow, W. F., 99, (1124)
Rodriquez, F., (769)
Rodriguez-Kabana, R., (773), (819)
Roechan, M., (793)
Rohrbach, K. G., 803
Roncadori, R. W., 567
root-knot nematode (see **Meloidogyne** spp.)
Rosa, N., (1049)
Ross, A. F., (600), (610)
Rotem, J., (532)
Routley, D. G., (1422)
Rowe, R. C., 393, 422
Royse, D. J., 1319
Rufner, R., 345
Ruppel, E. G., 734, 785
Russell, G. E., (811)
Russell, T. E., 359
rye, Pythium myriotylum on, oospore density in soil related to infection, 570

safflower
Phytophthora root rot of, water relations in, 886
seedlings of, use in Phytophthora cactorum detection in soil, application to population study, 1424, **1426**
Verticillium dahliae on, survival and dissemination in seed, 696, **697**
Saito, Y., (523), 793
Sally, B. K., (409)
Sanchez, L. E., 726
Sanders, J. S., (840)
Sanders, P., (836)
Sands, D. C., 921
Santiago, A. G., (769)
Sauer, D. B., (1259)
Scarborough, B. A., 835
scar skin disease, on apple, histopathology of, 707, **708**, **710–712**
Schadler, D. L., 912
Schiffmann-Nadel, M., 630
Schipper, A. L., Jr., 440
Schizaphis graminum, pea enation mosaic virus transmitted by, 496
Schmidt, R. A., (336)
Schmitt, C. G., (828)
Schmitthenner, A. F., (69)
Schneider, R. W., 63

Schreiber, L. R., (634)
Schroeder, B., (660), (1181)
Schroth, M. N., (353), (380), (425)
Scirrhia acicola, on longleaf pine, environmental factors affecting, 1389
Sclerospora sorghi, conidia of, cryogenic storage, 828
Sclerotinia sclerotiorum (see also **Whetzelinia sclerotiorum**)
on bean, infection by ascospores, 673, **675–677**
on sunflower, photoperiod effect on susceptibility, 1293, **1295**, **1296**
sclerotia of, isolation from soil and viability assay of, **1431**
Sclerotium
oryzae
fungistasis in sclerotia of, 283
on rice
genetics of resistance to, 968
virulence and fitness related to sporulation, sclerotium production, and growth rate, 972
rolfsii
on peanut
biocontrol by Trichoderma, 819
effect of leafspot fungicides on, 773
Scott, G. E., (223)
Scott, H. A., (741)
Seitz, L. M., 1259
Sekiguchi, A., (82)
Septoria tritici, on wheat, resistance to, 761
Sequeira, L., (731), (1004), (1336)
Setosphaeria turcica (see also **Helminthosporium** turcicum)
pathogenicity inheritance in, 280
Shain, L., 88
Shalla, T. A., (493)
Shamiyeh, N. B., (1178)
Shaner, G., 761
Sharp, E. L., (409)
Shepherd, R. J., (948), (1218)

Smith, D. R., 1160
Smith, H. J., (835)
Smith, P. M., (138)
Smith, S. H., (836)
Smith, S. N., 190
Snow, G. A., 170
snow mold
Typhula spp. on, taxonomy of, 1108
unidentified basidiomycete on legumes and grasses, antagonism between isolates of, 877, **878**
Snyder, W. C., (5), (190)
Sobers, E. K., 331
sodium o-phenylphenate (see **fungicides,** specific)
soil fungistasis, leaching model system for, quantitative evaluation of, 460
Solangi, G. R. M., (699)
Solanum
melongena, phytoalexins from, in fruits of, 859
phureja, antibacterial compound from, role in bacterial wilt, 1336
tuberosum (see **potato**)
sorghum
Setosphaeria turcica on, genetics of pathogenicity, 280
stalk rot of, ecofallow effect on, 1021
storage of weathered grain from, alternariols related to, 1259
Sorghum bicolor, Sclerospora sorghi on, bioassay host for cryogenic restored conidia of, 828
southern corn leaf blight (see **Helminthosporium** maydis)
soybean
bacterial blight of, antibiotic control on seedlings, 844
benomyl applied to leaves of, movement of carbamate into seeds of, 1387
brown stem rot of, toxin production in, 89
Heterodera and Phytophthora relations, 722
peanut mottle virus on
resistance to, 95
source and spread, 917
penicillin movement in seeds using dichloromethane, 1319
Phakopsora pachyrhizi on, uredial development in, 822, **823**
Phytophthora megasperma sojae on
hydroxyphaseollin and other compounds from, 635
wild-type strains for genetic research, 592
Phytophthora root rot of, chemical control of, 69
Pseudomonas glycinea on, infection from aerosols, 737
rhizobial root nodules of, electron microscopy in, 447, 449, 450, 452, 453
seed-borne fungi of, effect of 3 fungicides on, 553
tobacco ringspot virus on, aspartate transcarbamylase activity in infected leaves, 1079
virus infection of, plant characteristics and chemical composition of, 1154
Xanthomonas phaseoli sojensis on, effect of peroxidase and phenolic compounds on, 686
soybean mosaic virus, Brazilian isolate of, seed transmission in, 713, **715**
Spalding, D. H., 458, (1299)
Sphaerotheca fuligena, spore release factors, 1303
Spiroplasma citri, acquisition through membranes by insects, 1143
spore germination, grass and pine-needle smoke effects on, 28
Spotts, R. A., 39, 45, (645)
Spurr, H. W., Jr., 417
squash mosaic virus, nonreciprocal cross-protection between strains, 837
Stace-Smith, R., (660)
Stack, R. W., 468
Stahmann, M. A., (1032)
Stanghellini, M. E., 86, (670)
Statler, G. D., 627
Stavely, J. R., (507), 897
Steadman, J. R., (250), 1323
Steindl, D. R. L., (138)
Stemphylium
botryosum, spore release factors, 1303
botryosum lycopersici, sporulation of, in tomato, wet-dry regimes, 532
Stipes, R. J., 188, (504)
Stoessl, A., (168), (632), (859)
stone fruits (see **Prunus**)
Strand, L. L., 830
Streptomyces scabies, on potato, resistance related to glycoalkaloid content, 1045
Stuteville, D. L., (638), (929)
sudangrass, ratoon stunting disease of, electron microscopy in, 287, **288–294**
sugarbeet
Cercospora beticola on, benomyl tolerant strains of, 785
curly top disease of, rust related to, 361
Penicillium spp. on stored beets, 926
western yellows and mild yellowing viruses on, serological relation, 811
sugarcane
eye spot of, screening for resistance in field, 955
ratoon stunting disease of, anatomy related to resistance to, 138
sunflower
downy mildew of, biotic and climatic factors affecting, 751
Sclerotinia sclerotiorum on, photoperiod effect on resistance, 1293, **1295**, **1296**
Sutton, T. B., 1009
sweet potato, virus indexing in, meristem tip use, 769, **770**
Synchytrium endobioticum, on potato, sporangia of, viability and secondary fluorescence in, 374, **377**

Tani, T., 1190
Tantera, D. M., (793)
Tate, K. G., 977
Taylor, D. P., (175)
Teakle, D. S., 138
techniques
cryogenic storage, Sclerospora sorghi conidia, 828
culture tube closure method, airborne fungus and mite contamination prevented by, 833
baiting method for Phytophthora megasperma in natural soil, 1267
blotter and guaiacol agar for detection of rice seed pathogens, 1325
fungal mass determination in plant tissue, chromatographic estimation of flucosamine, 1032
isolation of sclerotia of Sclerotinia sclerotiorum from soil by wet and dry sieving, 1431
viability test for sclerotia of Sclerotinia sclerotiorum,1431
medium for isolation of Calonectria crotalaria from soil, 1036
meristem culture, cassava mosaic disease eliminated by, 826, **827**
nematode virus relation on cucumber affected by, 134
quantification of Verticillium albo-atrum microsclerotia in cotton and culture, 1027
remote sensing of vegetation damage, use of satellite data, 1056
seed impregnation with penicillin, dichloromethane vehicle for, 1319
selective medium for Monilinia on stone fruits, 1233
serological method for detecting barley stripe mosaic virus, 948

serological screening for double-stranded RNA of mycoviruses, 851
virus antigen preservation by freeze-drying, 1202
Xanthomonas campestris detected in crucifer seed, 1034
temperature, coefficients of, use in plant pathology, 1198
Templeton, G. E., (495)
Thanatephorus cucumeris (see also **Rhizoctonia solani**)
basidia of, induced by soil-over-culture method, 730
thiabendazole (see **fungicides,** specific)
Thielavia terrestris, on alder, poplar, and pine wood, chemical changes caused by, 473
Thielaviopsis basicola, on tobacco, chlorogenic acid in cultivars of, 1049
thiram (see **fungicides,** specific)
Thomson, S. V., 353
Thurston, H. D., (1272)
Tilletia controversa, on barley, susceptibility to, 654, **655**
Timian, R. G., (848)
Timmer, L. W., 241
tobacco (see also **Nicotiana spp.**)
brown spot of, postinoculation leaf wetness related to, 897, **898**
ozone resistance in TMV-infected plants, 1054
ozone response in, unrelated to root system characteristics, 1239
Phytophthora parasitica on, systemic fungicide for, 22, **24, 25**
Pseudomonas solanacearum, Colombia isolates of, characteristics, 1004
Pseudomonas solanacearum race 1 on, hypersensitivity induced in leaves of, 731
Thielaviopsis basicola of, relation to chlorogenic acid, 1049
virus-infected leaves, detection of symptomless tissue, 600, **601, 602, 604-607**
tobacco etch virus, serological relation to maize dwarf mosaic and turnip mosaic viruses, 334
tobacco mosaic virus
on bean, staining reaction in tissue, 1396
on cactus, severe strain from **824**
on cucumber, electron microscope study, 32, **33-38**
properties in heat-induced lesions on tobacco, 610
on tobacco and bean, ozone resistance related to, 1054
tobacco necrosis virus, on bean, staining reaction in tissue, 1396
tobacco ringspot virus
on cucumber, nematode vector for, temperature effects, 134
on geranium, seed transmission, 835
on soybean, aspartate transcarbamylase activity in, 1079
Tolin, S. A., 321
tomato
Alternaria alternata lycopersici on, stem canker of, 880, **881, 882**
bacterial canker of, Ca nutrition effect on, 84
blackmold of ripe fruit, occurrence and severity factors affecting, 1352
Corynebacterium michiganense and Meloidogyne incognita interaction on, 1332
curly top virus of, sulfate uptake and translocation in, 77
damping-off fungi, effect of diphenamid on, 431
Fusarium-infected, antifungal activity from extracts of, 93
Fusarium oxysporum lycopersici on, technique for identifying clones, 726, **727**
late blight of, capsidiol for control of, **168**
Meloidogyne-Rhizoctonia complex on roots of, 265, **267, 268, 270**
Phytophthora infestans race O on, ontogenetic predisposition to, 1422
Pseudomonas solanacearum on, resistance broken down by, 1272
soft rot of, inheritance of tolerance to, 1146
Stemphylium botryosum lycopersici on, sporulation in wet-dry regimes, 532
Verticillium albo-atrum on, light duration effect on, 647
tomato ring-spot virus, on geranium, seed transmission, 835
Toussoun, T. A., (575)
toxin (see also **phytoalexin**)
aflatoxin, on cotton, Aspergillus flavus-infected seed of, 1043
from Alternaria mali, on apple, 82
from Ascochyta chrysanthemi, purification and characterization, 912
ergonovine and ergocristine from ergot, on Triticale, 455
Helminthosporium maydis race T on corn leaves, 616
in sugarcane, Bipolaris sacchari infection, 955
tentoxin, from Alternaria tenuis, crystallization and purification, 495
victorin, ethylene production in susceptible oat cultivars, 88
Trichoconis padwickii, on rice seed, methods for detection of, 1325
Trichoderma
harzianum, biological control agent in peanut fields, 819
viride
on peanut
benomyl inhibition of, 773
interaction with fungi causing pod rot, 1375
Trifolium subterraneum, Kabatiella caulivora on, plant age factor, 197
triticale
ergot in, detection method for, 455
Phoma glomerata on, new pathogen, role of wet period on resistance, 1236
Triticum aestivum (see **wheat**)
Tsai, S. D., 1027
Tschanz, A. T., 597
Tsuchizaki, T., 523
Tu, C. C., 730
Tu, J. C., 447
Turner, M. T., 735
turnip mosaic virus
on lettuce, resistance to, 243
serological relation to maize dwarf mosaic and tobacco etch viruses, 334
Typhula spp.
taxonomic relations in mating experiments for, 1108
on wheat in Pacific Northwest, 755, **756, 757**

Uecker, F. A., 822
Ueno, T., 82
Ulmus (see **elm**)
ultrastructure (see also **electron microscopy**)
bean chloroplasts treated with benomyl and ozone, 345, **347**
bean leaves infiltrated with bacteria, 777, **778**
pepper cells
Phytophthora infestans in incompatible reaction, 1274, **1276-1278, 1280, 1282**
with Phytophthora and Monilinia on, interactions, 1409, **1410-1412, 1414**
Puccinia coronata avenae, haustoria affected by fungicides, 388, **390, 391**
tobacco mosaic virus, in cucumber, starch lesions in, 32, **33-38**
Urocystis colchici, nuclear history of teliospores, 994, **995, 997, 998**
Unwin, C. H., (168), (632), (859), (1286), (1417)
Upper, C. D., (1082)
Urocystis colchici, teliospores of, nuclear history of, 994, **995, 997, 998**

Uromyces betae, on sugarbeet, curly top against as protectant, 361
Ustilago hordei
carboxin sensitivity and tolerance in strains of, 936
tolerance to carboxin and benomyl inherited in, 563

Vaccinium
ashei, Phytophthora cinnamomi on, pathogenicity and histopathology of, 789, **791**
corymbosum
canker and dieback disease of, etiology and symptomatology in, 105, **108**
Godronia cassandrae on, histopathology of infection, 1327, **1328**
mummy berry disease of, epidemiology and control, 229
Phytophthora cinnamomi on, pathogenicity and histopathology of, 789, **791**
Vakili, N. G., 401
Vande Linde, F., (336)
Van Gundy, S. D., (265)
Venere, R. J., (206)
Venette, J. R., 737
Verticillium
albo-atrum (dahliae)
on cotton
microsclerotium numbers quantified, method for, 1027
peroxidase activity in cell walls related to polygalacturonase, 830
on mint, cross-protection with V. nigrescens, 767, **768**
pectic enzyme of, 141
on potato
inoculum level effect, 225
residual effect of fumigation for, 1419
resistance related to glycoalkaloid content, 1045
on safflower, survival and dissemination in seed, 696, **697**
on sunflower, aluminum effect on growth and pathogenicity of, 202
tobacco cyst nematode relation to, on tomato, 81
on tomato, light duration effect on, 647
malthousei, zineb sensitivity and benomyl tolerance to, 637
nigrescens, on mint, cross-protection with V. dahliae, **767, 768**
Vigna
sinensis, phytoalexins isolated from germinating seeds of, 91
unguiculata
bacterial blight and canker of, in Puerto Rico, 401
leaf spot of, extract effects on pathogens, 63
Pythium stem rot in, benzimidazole fungicides increase infection, 217
viruses (see also under specific virus names)
cross-protection, letter to editor, 221
dependent aphid transmission in, 99
indexing by meristem tip culture, in sweet potato, 769, **770**
polyvirus group, new on papper in Nigeria, 1329, **1330, 1331**
on potato, transmission lack via true seed, 1347
preservation of antigens by freeze-drying, 1202
RNA mycoviruses, double-stranded, detection by serological screening test, 851
serological relations among viruses in cucumber mosaic virus group, 65
strain interference and cross-protection in citrus and herbaceous hosts, 50, **52**
symptomless virus-infected tissue detected, 600, **601, 602, 604-607**
tymovirus, in Abelia, purification and properties, 891, **893**

CONTENTS OF VOLUME 65, 1975

No. 1 — JANUARY

Author's Guide 1

Biological control of ergot by Fusarium ..... R. L. MOWER, W. C. SNYDER, and J. G. HANCOCK 5

Diallel analysis for reaction of eight corn inbreds to Helminthosporium maydis race T ..... S. M. LIM 10

Microorganisms associated with bottom rot of lettuce grown on organic soil in New York State
D. J. PIECZARKA and J. W. LORBEER 16

Dowco® 269: a new systemic fungicide for control of Phytophthora parasitica of tobacco ..... R. L. NOVEROSKE 22

Some effects of pine-needle or grass smoke on fungi ..... J. R. PARMETER, JR. and B. UHRENHOLT 28

An electron microscope study of starch lesions in cucumber cotyledons infected with tobacco mosaic virus
J. COHEN and G. LOEBENSTEIN 32

The effect of benzimidazole on some membrane properties of ozonated pinto bean
R. A. SPOTTS, F. L. LUKEZIC, and R. H. HAMILTON 39

The effect of benzimidazole, cholesterol, and a steroid inhibitor on leaf sterols and ozone resistance of bean
R. A. SPOTTS, F. L. LUKEZIC, and N. L. LACASSE 45

Purification and properties of citrus-leaf-rugose virus ..... S. M. GARNSEY 50

Role of wild grasses in epidemics of powdery mildew on small grains in Israel ..... N. ESHED and I. WAHL 57

Inhibition of conidial germination and germ tube growth of Cercospora canescens by cowpea leaf diffusates
R. W. SCHNEIDER and J. B. SINCLAIR 61

Some cucumber mosaic virus antisera contain antibodies specific for both peanut stunt virus and chrysanthemum mild mottle virus ..... G. I. MINK, N. IZUKA, and K. KIRIYAMA 63

Comparative efficacy of 2-chloro-6-methoxy-4-(trichloromethyl)pyridine and ethazole for control of Phytophthora root rot of rhododendron and soybean ..... H. A. J. HOITINK and A. F. SCHMITTHENNER 69

Technique for scanning electron microscopy of fungal structures within plant cells ..... D. A. KINDEN and M. F. BROWN 74

Sulfate uptake and translocation in curly top infected tomatoes .... N. J. PANOPOULOS, G. FACCIOLI, and A. H. GOLD 77

PHYTOPATHOLOGICAL NOTES

Effect of the tobacco cyst nematode, Heterodera tabacum, on severity of Verticillium and Fusarium wilts of tomato ..... P. M. MILLER 81

Isolation of AM-toxin I, a new phytotoxic metabolite from Alternaria mali
T. UENO, Y. HAYASHI, T. NAKASHIMA, H. FUKAMI, S. NISHIMURA, K. KOHMOTO, and A. SEKIGUCHI 82

Influence of calcium nutrition on bacterial canker of resistant and susceptible Lycopersicon spp.
R. L. FORSTER and E. ECHANDI 84

Identification of soft-rot Erwinia associated with blackleg of potato in Arizona . M. E. STANGHELLINI and J. C. MENELEY 86

Production of ethylene by oats resistant and susceptible to victorin ..... L. SHAIN and H. WHEELER 88

Evidence for toxin production by a strain of Cephalosporium gregatum ..... L. E. GRAY and D. W. CHAMBERLAIN 89

The isolation of phytoalexins from germinating seeds of Cicer arietinum, Vigna sinensis, Arachis hypogaea, and other plants ..... N. T. KEEN 91

Antifungal activity of extracts from Fusarium wilt-susceptible and -resistant tomato plants
F. HAMMERSCHLAG and M. E. MACE 93

No. 2 — FEBRUARY

Resistant and susceptible reaction of soybeans to peanut mottle virus ..... J. W. DEMSKI and C. W. KUHN 95

Barley yellow dwarf: dependent virus transmission by Rhopalosiphum maidis from mixed infections ..... W. F. ROCHOW 99

Etiology and symptomatology of canker and dieback diseases on highbush blueberries caused by Godronia (Fusicoccum) cassandrae and Diaporthe (Phomopsis) vaccinii ..... D. P. WEINGARTNER and E. J. KLOS 105

Transmission of pepper mottle virus from susceptible and resistant pepper cultivars ..... T. A. ZITTER 110

Relationship of Botryosphaeria dothidea and Hendersonula toruloidea to a canker disease of almond H. ENGLISH, J. R. DAVIS and J. E. DE VAY 114

Influence of water potential on growth and survival of Whetzelinia sclerotiorum ..... R. G. GROGAN and G. S. ABAWI 122

Localization of infection in American elms resistant to Ceratocystis ulmi W. A. SINCLAIR, J. P. ZAHAND, and J. B. MELCHING 129

Some effects of temperature on Xiphinema americanum and infection of cucumber by tobacco ringspot virus ..... L. B. DOUTHIT and J. M. MC GUIRE 134

Ratoon stunting disease of sugarcane: possible correlation of resistance with vascular anatomy ..... D. S. TEAKLE, P. M. SMITH and D. R. L. STEINDL 138

Killing of plant cells by pectic enzymes: the lack of direct injurious interaction between pectic enzymes or their soluble reaction products and plant cells ..... H. G. BASHAM and D. F. BATEMAN 141

Influence of atrazine on the severity of Fusarium root rot in pea and corn ..... J. A. PERCICH and J. L. LOCKWOOD 154

Developmental changes in sclerotia of the rice sheath blight fungus ..... T. HASHIBA and S. MOGI 159

Association of two ribonucleic acid species with cadang-cadang disease of coconut palm ..... J. W. RANDLES 163

Experimental control of late blight of tomatoes with capsidiol, the phytoalexin from peppers E. W. B. WARD, C. H. UNWIN and A. STOESSL 168

Variation in pathogenicity of diverse sources of Cronartium fusiforme on selected slash pine families ..... G. A. SNOW, R. J. DINUS, and A. G. KAIS 170

Some factors affecting penetration of bean roots by larvae of Meloidogyne incognita and M. javanica ..... B. W. NGUNDO and D. P. TAYLOR 175

The effects of nuclear restorer genes of Texas male-sterile cytoplasm on host response to Helminthosporium maydis race T ..... L. S. WATRUD, A. L. HOOKER, and D. E. KOEPPE 178

Isolation and quantitative determination of Macrophomina phaseolina from soil ..... G. C. PAPAVIZAS and N. G. KLAG 182

Fusarium oxysporum f. sp. perniciosum on Fusarium-wilted mimosa trees ..... R. J. STIPES and P. M. PHIPPS 188

Persistence of Fusarium oxysporum f. sp. vasinfectum in fields in the absence of cotton ..... S. N. SMITH and W. C. SNYDER 190

Development of Kabatiella caulivora in plants of Trifolium subterraneum 'Yarloop' of different ages ..... K. HELMS 197

Effect of soluble aluminum on growth and pathogenicity of Verticillium albo-atrum and Whetzelinia sclerotiorum from sunflower ..... R. G. ORELLANA, C. D. FOY, and A. L. FLEMING 202

Necrosis Induction in cotton ..... D. G. HOPPER, R. J. VENERE, L. A. BRINKERHOFF, and R. K. GHOLSON 206

PHYTOPATHOLOGICAL NOTES

An improved method for evaluating rice sheath blight ..... K. S. AMIN 214

Changes in respiration and ethylene evolution induced by Diplodia natalensis in orange fruit G. ZAUBERMAN and R. BARKAI-GOLAN 216

Increased incidence of Pythium stem rot in cowpeas treated with benomyl and related fungicides R. J. WILLIAMS and A. AYANABA 217

Benomyl-soil microbial interactions ..... M. R. SIEGEL 219

No. 3 — MARCH

Letter to the Editor: Understanding generates possibilities ..... G. A. DE ZOETEN and R. W. FULTON 221

Maternal influence on response of corn to Fusarium moniliforme
J. N. LUNSFORD, M. C. FUTRELL, and G. W. SCOTT 223

The effect of inoculum levels on field evaluations of potatoes for Verticillium wilt resistance
J. A. FRANK, R. E. WEBB, and D. R. WILSON 225

Mummy berry disease of highbush blueberry: epidemiology and control
D. C. RAMSDELL, J. W. NELSON, and R. L. MYERS 229

Isolation and characterization of fluorescent pseudomanads from apparently healthy peach trees
W. M. DOWLER and D. J. WEAVER 233

Survival of Macrophomina phaseolina sclerotia in soil: effects of soil moisture, carbon:nitrogen ratios, carbon sources, and nitrogen concentrations ..... O. D. DHINGRA and J. B. SINCLAIR 236

The effect of rainfall, drainage, tree spacing, and fungicide application on the incidence of citrus brown rot ..... L. W. TIMMER and J. E. FUCIK 241

Reaction of downy mildew-resistant lettuce cultivars to infection by turnip mosaic virus ... F. W. ZINK and J. E. DUFFUS 243

Liquid nitrogen storage of phytopathogenic bacteria ..... L. W. MOORE and R. V. CARLSON 246

Survival of Whetzelinia sclerotiorum and initial infection of dry edible beans in western Nebraska ..... G. E. COOK, J. R. STEADMAN, and M. G. BOOSALIS 250

Detection and translocation of benomyl in postharvest-treated peaches and nectarines ..... D. J. PHILLIPS 255

Quantitative aspects of pathogenesis of Xanthomonas pruni in peach leaves ..... E. L. CIVEROLO 258

A disease complex of okra and tomato involving the nematode, Meloidogyne incognita, and the soil-inhabiting fungus, Rhizoctonia solani ..... J. K. GOLDEN and S. D. VAN GUNDY 265

Segregation of pathogenicity types and host-specific toxin production in progenies of crosses between races T and O of Helminthosporium maydis (Cochliobolus heterostrophus) ..... O. C. YODER and V. E. GRACEN 273

Soil fumigation and fall pruning related to peach tree short life ..... W. C. NESMITH and W. M. DOWLER 277

Inheritance of pathogenicity in Setosphaeria turcica ..... A. H. HAMID and M. ARAGAKI 280

Fungistasis of sclerotia of Sclerotium oryzae ..... R. KEIM and R. K. WEBSTER 283

Electron microscopy in situ of the bacterium associated with ratoon stunting disease in sudangrass
J. F. WORLEY and A. G. GILLASPIE, JR. 287

Biocontrol of corn root infection in the field by seed treatment with antagonists ..... T. KOMMEDAHL and I. C. MEW 296

Source of primary inoculum and effects of temperature and moisture on infection of beans by Whetzelinia sclerotiorum ..... G. S. ABAWI and R. G. GROGAN 300

Aggregation of host cytoplasm and the formation of papillae and haustoria in powdery mildew of barley ..... W. R. BUSHNELL and S. E. BERGQUIST 310

Responses of detached tissues of adult wheat plants to Puccinia graminis tritici ..... A. H. ATIF and R. D. WILCOXSON 318

Peanut stunt virus in crownvetch ..... S. A. TOLIN and J. D. MILLER 321

Heritability of field resistance to the oat crown rust fungus ..... M. D. SIMONS 324

Separate and combined effects of Paratylenchus neoamblycephalus and Criconemoides xenoplax on 'Myrobalan' plum ..... A. L. BRAUN, H. MOJTAHEDI, and B. F. LOWNSBERY 328

Cylindrocladium heptaseptatum sp. nov. on fronds of Polystichum adiantiforme from Honduras ..... E. K. SOBERS, S. A. ALFIERI, JR., and J. F. KNAUSS 331

Serological relationships among potyviruses: maize dwarf mosaic virus, tobacco etch virus, and turnip mosaic virus ..... M. R. MC LAUGHLIN, J. H. HILL, and H. I. BENNER 334

Effect of differential selection pressure on fusiform rust resistance in phenotypic selections of slash pine ..... R. E. GOODARD, R. A. SCHMIDT, and F. VANDE LINDE 336

The role of phenols in Botrytis brown stain of onion ..... C. A. CLARK and J. W. LORBEER 338

Effect of inoculum concentration on resistance of lima bean to Rhizoctonia solani ..... H. L. WARREN 341

Ultrastructure of chloroplasts of Phaseolus vulgaris leaves treated with benomyl and ozone ..... R. RUFNER, F. H. WITHAM, and H. COLE, JR. 345

Anatomical marker for resistance of Ulmus americana to Ceratocystis ulmi W. A. SINCLAIR, J. P. ZAHAND, and J. B. MELCHING 349

Occurrence of fire blight of pears in relation to weather and epiphytic populations of Erwinia amylovora ..... S. V. THOMSON, M. N. SCHROTH, W. J. MOLLER, and W. O. REIL 353

PHYTOPATHOLOGICAL NOTES

Plantago wilt ..... T. E. RUSSELL 359

Protection of sugar beet plants against development of rust disease by infection with curly top agent A. C. MAGYAROSY, B. B. BUCHANAN, and J. E. DUFFUS 361

No. 4 — APRIL

Arthur H. Eddins, 1893-1974 ..... P. DECKER 363

Arthur Kneeland Parker, 1922-1974 ..... G. WALLIS 364

Resistance and susceptibility to Phytophthora megasperma expressed in alfalfa cotyledons ..... R. G. PRATT, J. E. MITCHELL, and D. A. WILLIS 365

The influence of controlled stresses on susceptibility of European white birch stems to attack by Botryosphaeria dothidea ..... C. R. CRIST and D. F. SCHOENEWEISS 369

Induction of secondary fluorescence in the resting sporangium of the potato wart disease fungus, Synchytrium endobioticum (European race 2) ..... M. C. HAMPSON 374

Conjugative transfer of Pseudomonas aeruginosa R factors to plant pathogenic Pseudomonas spp. N. J. PANOPOULOS, W. V. GUIMARAES, J. J. CHO, and M. N. SCHROTH 380

Effects of two systemic fungicides on ultrastructure of haustoria of the oat crown rust fungus ..... M. D. SIMONS 388

Ascospore formation and discharge by Calonectria crotalariae ..... R. C. ROWE and M. F. BEAUTE 393

Pathogenicity of soil-borne Bipolaris sorokiniana on seed and roots of three perennial grasses C. F. HODGES and G. A. WATSCHKE 398

Bacterial blight of beans caused by two Xanthomonas pathogenic types from Puerto Rico N. G. VAKILI, W. J. KAISER, J. E. PEREZ, and A. CORTES-MONLLOR 401

Factors affecting postharvest development of Colletotrichum gloeosporioides in citrus fruits ..... G. E. BROWN 404

Possible simple inheritance of resistance to stripe rust in Basin wildrye S. R. CHAPMAN, E. L. SHARP, and B. K. SALLY 409

Formation of oleoresin and lignans in sapwood of white spruce in response to wounding J. H. HART, J. F. WARDELL, and R. W. HEMINGWAY 412

Characterization of endophytic fungi in healthy leaves of Nicotiana spp. ..... H. W. SPURR, JR. and R. E. WELTY 417

Variability in virulence of Cylindrocladium crotalariae isolates on peanut ..... R. C. ROWE and M. K. BEAUTE 422

Ornamental plants as carriers of Pseudomonas aeruginosa . J. J. CHO, M. N. SCHROTH, S. D. KOMINOS, and S. K. GREEN 425

Effects of diphenamid on Rhizoctonia solani, Pythium aphanidermatum, and damping-off of tomato
A. W. COLE and W. E. BATSON 431

Effects of maize dwarf mosaic virus on water relations of corn .....D. W. LINDSEY and R. T. GUDAUSKAS 434

Changes in dehydrogenase and peroxidase activities of aspen infected with Hypoxylon mammatum .. A. L. SCHIPPER, JR. 440

Relationship between deformed-fruit disease of papaya and boron deficiency..... D. WANG and W. H. KO 445

Rhizobial root nodules of soybean as revealed by scanning and transmission electron microscopy.....J. C. TU 447

A method for the detection of ergot contamination in ground Triticale grain
J. E. ROBBERS, V. M. KRUPINSKI, H. S. SHERIAT, and D. M. HUBER 455

Low-oxygen high-carbon dioxide controlled atmosphere storage for control of anthracnose and chilling injury of avocados
D. H. SPALDING and W. F. REEDER 458

Quantitative evaluation of a leaching model system for soil fungistasis .....J. L. LOCKWOOD 460

Factors associated with the resistance of barley to Helminthosporium teres ..... B. L. KEELING and E. E. BANTTARI 464

Protection of Douglas-fir seedlings against Fusarium root rot by a mycorrhizal fungus in the absence of mycorrhiza formation ..... R. W. STACK and W. A. SINCLAIR 468

Changes in the chemical composition of wood caused by six soft-rot fungi
W. E. ESLYN, T. K. KIRK, and M. J. EFFLAND 473

Association of rickettsialike bacteria with plum leaf scald disease
E. W. KITAJIMA, M. BAKARCIC, and M. V. FERNANDEZ-VALIELA 476

Inheritance of resistance to cucumber mosaic virus in melons ..... Z. KARCHI, S. COHEN, and A. GOVERS 479

Evaluation of resistance in Gladiolus sp. to Fusarium oxysporum f. sp. gladioli .... R. K. JONES and J. M. JENKINS, JR. 481

Disease incidence and infection rates of Cercospora apii in plant spacing plots ..... R. D. BERGER 485

Effect of low concentrations of Xanthomonas vesicatoria infiltrated into pepper leaves .....A. A. COOK 487

Air-spora above a Kansas wheat field..... M. G. EVERSMEYER and C. L. KRAMER 490

The use of fluorescent antibodies for detection of Pierce's disease bacteria in grapevines and insect vectors
J. G. AUGER and T. A. SHALIA 493

PHYTOPATHOLOGICAL NOTES

Procedures for crystallization and further purification of tentoxin
S. H. WOODHEAD, G. E. TEMPLETON, W. L. MEYER, and R. B. LEWIS 495

Tests for transmission of pea enation mosaic virus by oligophagous mustard and grain aphids .....L. R. NAULT 496

Interrelationship of Penicillium digitatum and P. italicum in thiabendazole-treated oranges ..... Y. GUTTER 498

Platyspora pentamera, a pathogen of wheat ..... R. M. HOSFORD, JR. 499

Survival of Poria weirii in wood buried in urea-amended forest soil.....E. E. NELSON 501

Chemical prevention of ascocarp formation in Claviceps purpurea.....J. R. HARDISON 502

Control of Fusarium wilt of mimosa with benomyl and thiabendazole ..... P. M. PHIPPS and R. J. STIPES 504

No. 5 — MAY

Edward D. Clayton, 1895-1974 ..... E. L. MOORE, C. J. NUSBAUM, and J. R. STAVELY 507

Bacterial populations on basal lettuce leaves and in soil from under lettuce plants . D. J. PIECZARKA and J. W. LORBEER 509

Survival of tropical Xanthomonas oryzae in relation to substrate, temperature, and humidity ..... S. P. Y. HSIEH and I. W. BUDDENHAGEN 513

Effect of soil aeration on Fusarium root rot in beans ..... D. E. MILLER and D. W. BURKE 519

The biological functions of short and long particles of soil-borne wheat mosaic virus
T. TSUCHIZAKI, H. HIBINO, and Y. SAITO 523

Sporulation of Stemphylium botryosum f. sp. lycopersici in tomatoes and of Alternaria porri f. sp. solani in potatoes under alternating wet-dry regimes ..... E. BASHI and J. ROTEM 532

Phytotoxicity of benomyl to crucifers ..... A. A. REYES 535

Effect of cultivar and rootstock on incidence of viral and nonviral symptoms in PRSV-infected Prunus domestica ..... A. W. HELTON 539

Epidemiology of European apple canker in California ..... H. J. DUBIN and H. ENGLISH 542

Slowing of spore germination with changes between warm and cool temperatures
P. E. WAGGONER and J-Y. PARLANGE 551

Effect of three fungicides on internally seed-borne fungi and germination of soybean seeds
M. A. ELLIS, M. B. ILYAS, and J. B. SINCLAIR 553

Ring nematodes increase development of bacterial cankers in plums
H. MOJTAHEDI, B. F. LOWNSBERY, and E. H. MOODY 556

Morphology, host range, and serological relationships of pepper mottle virus
D. E. PURCIFULL, T. A. ZITTER, and E. HIEBERT 559

Inheritance of tolerance to carboxin and benomyl in Ustilago hordei ..... Y. BEN-YEPHET, Y. HENIS, and A. DINOOR 563

Evaluation of various control measures for cotton boll rot
R. W. RONCADORI, S. M. MC CARTER, and J. L. CRAWFORD 567

Density of Pythium myriotylum oospores in soil in relation to infection in rye ..... D. J. MITCHELL 570

Fusarium stub dieback of carnation .... P. E. NELSON, B. W. PENNYPACKER, T. A. TOUSSOUN, and R. K. HORST 575

Factors critical to mechanical transmissibility of wheat spindle streak mosaic virus ..... J. T. SLYKHUIS 582

Edaphic factors associated with the incidence and severity of disease caused by Fomes annosus in loblolly pine plantations in Virginia ..... S. A. ALEXANDER, J. M. SKELLY, and C. L. MORRIS 585

Phytophthora megasperma var. sojae: development of wild-type strains for genetic research
M. LONG, N. T. KEEN, O. K. RIBIERO, J. V. LEARY, D. C. ERWIN, and G. A. ZENTMYER 592

Ecological aspects of ascospore discharge in Gibberella zeae ..... A. T. TSCHANZ, R. K. HORST, and P. E. NELSON 597

The detection of symptomless virus-infected tissue in inoculated tobacco leaves ..... J. A. FOSTER and A. F. ROSS 600

Properties of the initial tobacco mosaic virus infection sites revealed by heating symptomless inoculated tobacco leaves ..... J. A. FOSTER and A. F. ROSS 610

Involvement of Helminthosporium maydis race T toxin during colonization of maize leaves ..... J. C. COMSTOCK and C. A. MARTINSON 616

Kernel infection, seedling blight, and wilt of maize caused by Colletotrichum graminicola
H. L. WARREN and R. L. NICHOLSON 620

Temperature effects on lesion development and sporulation after infection by races O and T of Bipolaris maydis ..... H. L. WARREN 623

Inheritance of black point resistance in durum wheat ..... G. D. STATLER, R. L. KIESLING, and R. H. BUSCH 627

PHYTOPATHOLOGICAL NOTES

Frost injury predisposes grapefruit to storage rots ..... M. SCHIFFMANN-NADEL, J. WAKS, and E. CHALUTZ 630

Inheritance of horizontal resistance to crown rust in oats ..... H. H. LUKE, R. D. BARNETT, and P. L. PFAHLER 631

Loroglossol: an orchid phytoalexin ..... E. W. B. WARD, C. H. UNWIN, and A. STOESSL 632

Isolation and identification of an antifungal agent from seeds of American elm ..... R. W. DOSKOTCH, S. L. KEELY, JR., and L. R. SCHREIBER 634

Coordinate production of hydroxyphaseollin and the yellow-fluorescent compound in soybeans resistant to Phytophthora megasperma var. sojae ..... N. T. KEEN and J. D. PAXTON 635

Increased sensitivity to zineb for Verticillium malthousei strains tolerant to benomyl ..... D. H. LAMBERT and P. J. WUEST 637

Cell wall ingrowths of nonhaustorial hyphae of Peronospora trifoliorum ..... T. J. MARTIN and D. L. STUTEVILLE 638

Association of mycoplasmalike organisms with bermudagrass yellow leaf M. BAR-JOSEPH, A. ZELCER, and G. LOEBENSTEIN 640

Inability of storage fungi to invade pea embryos: evidence against phytoalexin involvement ..... F. L. PFLEGER and G. E. HARMAN 642

Hydraulic conductivity of stem internodes related to resistance of American elms to Ceratocystis ulmi ..... J. B. MELCHING and W. A. SINCLAIR 643

The influence of soil zinc on nodulation, mycorrhizae, and ozone sensitivity in Pinto bean ..... W. D. MC ILVEEN, R. A. SPOTTS, and D. D. DAVIS 645

Effect of light duration on Verticillium wilt of tomato ..... J. P. JONES, P. CRILL, and R. B. VOLIN 647

No. 6 — JUNE

Histopathology of Cylindrocladium black rot of peanut ..... S. A. JOHNSTON and M. K. BEUTE 649

Susceptibility of barley to Tilletia controversa ..... W. G. DEWEY and J. A. HOFFMANN 654

The occurrence and biology of Botryotinia fuckeliana on beans in New York ..... F. J. POLACH and G. S. ABAWI 657

Hexagonal tubular structures in sieve tubes of apple leaves ..M. WEINTRAUB, R. STACE-SMITH, and B. SCHROEDER 660

Seed transmission studies of Xanthomonas oryzae in rice..... H. E. KAUFFMAN and A. P. K. REDDY 663

Variable effects of ozone on Pinto bean internodes ..... I. A. LEONE and E. BRENNAN 666

Establishment of an inactive population of Erwinia carotovora in healthy cucumber fruit J. C. MENELEY and M. E. STANGHELLINI 670

Infection of bean by ascospores of Whetzelinia sclerotiorum ..... G. S. ABAWI, F. J. POLACH, and W. T. MOLIN 673

Growth of the sporulating zone of Puccinia striiformis and its relationship to stripe rust epiphytology ..... R. G. EMGE, C. H. KINGSOLVER, and D. R. JOHNSON 679

Light and transmission electron microscopy of white pine blister rust canker..... B. L. WELCH and N. E. MARTIN 681

Enhancement of the bactericidal activity of a peroxidase system by phenolic compounds..... N. V. R. URS and J. M. DUNLEAVY 686

Susceptibility of American beachgrass and other dune plants to Marasmiellus mesosporus T. B. WARREN and L. T. LUCAS 690

Susceptibility of Pinus strobus and Lupinus spp. to Phytophthora cinnamomi ..... H. W. KIRBY and L. F. GRAND 693

Survival and dissemination of Verticillium in infected safflower seed ..... J. M. KLISIEWICZ 696

Inheritance in Cochoiobolus sativus ..... R. M. HOSFORD, JR., G. R. M. SOLANGI, and R. L. KIESLING 699

Relationship of Aspergillus flavus colony growth on three selective media to recovery from naturally infested soil .....G. J. GRIFFIN, R. H. FORD, and K. H. GARREN 704

Histopathology of scar skin disease of apple ..... P. E. PARKER and G. N. AGRIOS 707

Seed transmission of a Brazilian isolate of soybean mosaic virus ..... M. D. M. PORTO and D. J. HAGEDORN 713

Relative susceptibility of pecan cultivars to fungal leaf scorch and relationship to mineral composition of foliage ..... R. H. LITTRELL and R. E. WORLEY 717

Factors affecting epidemiology of bacterial fasciation of Chrysanthemum maximum ..... K. A. ODURO 719

Interrelationship of Heterodera glycines and Phytophthora megasperma var. sojae in soybeans M. O. ADENIJI, D. I. EDWARDS, J. B. SINCLAIR, and R. B. MALEK 722

PHYTOPATHOLOGICAL NOTES

A rapid technique for identifying the clones of Fusarium oxysporum f. sp. lycopersici causing crown- and root-rot of tomato ..... L. E. SANCHEZ, R. M. ENDO, and J. V. LEARY 726

A virus related to cucumber mosaic virus isolated from imported Ixora plants H. E. WATERWORTH and W. R. POVISH 728

A modified soil-over-culture method for inducing basidia in Thanetophorus cucumeris ..... C. C. TU and J. W. KIMBROUGH 730

A hypersensitive reaction induced in tobacco leaves by a compatible (race 1) isolate of Pseudomonas solanacearum ..... G. A. GRANADA and L. SEQUEIRA 731

A cultural variant of a benomyl-tolerant strain of Cercospora beticola ..... E. G. RUPPEL 734

A field spore production of Helminthosporium turcicum on Zea mays with and without monogenic resistance ..... M. T. TURNER and K. HART 735

Naturally produced aerosols of Pseudomanas glycinea ..... J. R. VENETTE and B. W. KENNEDY 737

Potential spread of Erwinia spp. in aerosols ..... D. C. GRAHAM and M. D. HARRISON 739

Cowpea chlorotic mottle and bean yellow stipple viruses ..... J. P. FULTON, R. GAMEZ, and H. A. SCOTT 741

No. 7 — JULY

Fellows of The American Phytopathological Society 743

Ruth Allen Award 748

Gerald George Thorne, 1890-1975 ..... E. W. HANSON and H. M. DARLING 749

Some biotic and climatic factors influencing sporadic occurrence of sunflower downy mildew ..... D. E. ZIMMER 751

Typhula species pathogenic to wheat in the Pacific Northwest ..... G. W. BRUEHL and B. M. CUNFER 755

Expression and effectiveness of resistance in wheat to septoria leaf blotch G. SHANER, R. E. FINNEY, and F. L. PATTERSON 761

Cross protection in mints by Verticillium nigrescens against V. dahliae ..... H. A. MELOUK and C. E. HORNER 767

Meristem tip culture and virus indexing of sweet potatoes R. ALCONERO, A. G. SANTIAGO, F. MORALES, and F. RODRIGUEZ 769

The effect of peanut leafspot fungicides on the nontarget pathogen, Sclerotium rolfsii P. A. BACKMAN, R. RODRIGUEZ-KABANA, and J. C. WILLIAMS 773

Effect of bacterial infiltration on photosynthesis of bean leaves ..... A. C. MAGYAROSY and B. B. BUCHANAN 777

Relationship of density of chlamydospores and zoospores of Phytophthora palmivora in soil to infection of papaya ..... B. N. RAMIREZ and D. J. MITCHELL 780

Biology of benomyl-tolerant strains of Cercospora beticola from sugar beet ..... E. G. RUPPEL 785

Pathogenicity and histopathology of Phytophthora cinnamomi on highbush and rabbiteye blueberry R. D. MILHOLLAND 789

Small bacilliform particles associated with penyakit habang (tungro-like) disease of rice in Indonesia ..... Y. SAITO, M. ROECHAN, D. M. TANTERA, and M. IWAKI 793

Enzymatic degradation of potato cell walls in potato virus X-free and potato virus X-infected potato tubers by Fusarium roseum 'avenaceum' ..... J. M. MULLEN and D. F. BATEMAN 797

The field induction of bacterial pink disease in pineapple fruit ..... K. G. ROHRBACH and J. B. PFEIFFER 803

Leaf, stem, crown, and root galls induced in Chrysanthemum by Agrobacterium tumefaciens ..... H. N. MILLER 805

Serological relationship between beet western yellows and beet mild yellowing viruses ..... J. E. DUFFUS and G. E. RUSSELL 811

Cytology of Ceratocystis ulmi ..... R. J. HOWARD and D. P. MAXWELL 816

A system for the growth and delivery of biological control agents to the soil P. A. BACKMAN and R. RODRIGUEZ-KABANA 819

Uredial development of Phakopsora pachyrhizi in soybeans M. A. MARCHETTI, F. A. UECKER, and K. R. BROMFIELD 822

PHYTOPATHOLOGICAL NOTES

A severe strain of tobacco mosaic virus from cactus ..... L. GIRI and M. CHESSIN 824

Elimination of cassava mosaic disease by meristem culture ..... K. K. KARTHA and O. L. GAMBORG 826

Cryogenic storage of conidia of Sclerospora sorghi ..... A. W. GALE, C. G. SCHMITT, and K. R. BROMFIELD 828

Solubilization of peroxidase activity from cotton cell walls by endopolygalacturonases L. L. STRAND and H. MUSSELL 830

Synergistic interactions of Pythium myriotylum with Fusarium solani and Meloidogyne arenaria in pod rot of peanut ..... R. GARCIA and D. J. MITCHELL 832

A simple culture tube closure method for prevention of contamination by airborne fungi and mites ..... L. T. RICHARDSON 833

Erratum (Proceedings of The American Phytopathological Society, Volume 1) 835

No. 8 — AUGUST

Squash mosaic virus variability: nonreciprocal cross-protection between strains ..... J. A. LIMA and M. R. NELSON 837

Resistance to Phytophthora root rot in selected lines of nondormant alfalfa R. B. HINE, F. A. GRAY, M. H. SCHONHORST, and J. S. SANDERS 840

Bacterial blight of soybean: seedling disease control ..... C. LEBEN 844

Some properties of oat blue dwarf virus ..... D. L. LONG and R. G. TIMIAN 848

Application of a serological screening test for detecting double-stranded RNA mycoviruses E. M. MOFFITT and R. M. LISTER 851

Sesquiterpenoid phytoalexins from fruits of eggplants ..... E. W. B. WARD, C. H. UNWIN, J. HILL, and A. STOESSL 859

Peach rosette: the morphology of an associated mycoplasmalike organism and the chemotherapy of the disease ..... H. C. KIRKPATRICK, S. K. LOWE, and G. NYLAND 864

Ecology and epidemiology of Rhizoctonia solani in field soil G. C. PAPAVISAS, P. B. ADAMS, R. D. LUMSDEN, J. A. LEWIS, R. L. DOW, W. A. AYERS and J. G. KANTZES 871

Antagonism between isolates of a snow mold pathogen ..... J. B. LEBEAU 877

A stem canker disease of tomato caused by Alternaria alternata f. sp. lycopersici R. G. GROGAN, K. A. KIMBLE, and I. MISAGHI 880

Water relations in safflower during Phytophthora root rot ..... J. M. DUNIWAY 886

Purification and properties of a tymovirus from abelia ..... H. E. WATERWORTH, J. M. KAPER, and R. KOENING 891

Relation of postinoculation leaf wetness to initiation of tobacco brown spot ..... J. R. STAVELY and L. J. SLANA 897

Benzimidazole-resistant mutant derived from a single ascospore culture of Botryotinia fuckeliana
F. J. POLACH and W. T. MOLIN 902

Comparative effects of monochromatic radiation on the germination of oospores of three Phytophthora spp. ..... O. K. RIBIERO, G. A. ZENTMYER, and D. C. ERWIN 904

Integrated effects of polygenic resistance and a protective fungicide on development of potato late blight ..... W. E. FRY 908

Ascochyta chrysanthemi toxin: purification and partial characterization ..... D. L. SCHADLER and D. F. BATEMAN 912

Source and spread of peanut mottle virus in soybean and peanut ..... J. W. DEMSKI 917

Ecology and physiology of fluorescent pectolytic pseudomonads ..... D. C. SANDS and L. HANKIN 921

PHYTOPATHOLOGICAL NOTES

An allele for low reaction to Puccinia graminis tritici in Chinese spring wheat ..... W. Q. LOEGERING 925

Penicillium claviforme and Penicillium variable: pathogens of stored sugar beets ..... W. M. BUGBEE 926

Purification of arabis mosaic virus isolated from a jasmine plant introduction ..... H. E. WATERWORTH 927

Effect of chlorine on Peronospora trifoliorum sporangial production and germination
P. M. FRIED and D. L. STUTEVILLE 929

Errata 930

No. 9 — SEPTEMBER

Responses of crown gall tissue to gravity compensation ..... S. J. KLEINSCHUSTER, B. L. BAKER, and R. BAKER 931

The physiological basis of carboxin sensitivity and tolerance in Ustilago hordei
Y. BEN-YEPHET, A. DINOOR, and Y. HENIS 936

Model for yield loss determination of bacterial blight of field beans utilizing aerial infrared photography combined with field plot studies ..... V. R. WALLEN and H. R. JACKSON 942

Serological detection of seed-borne barley stripe mosaic virus by a simplified radial-diffusion technique ..... S. A. SLACK and R. J. SHEPHERD 948

Field screening of sugarcane for eye spot resistance ..... J. L. DEAN and J. D. MILLER 955

Pathogenic races of Gymnosporangium juniperi-virginianae on apple ..... H. S. ALDWINCKLE 958

Microdensitometer measurements of sequential aerial photographs of field beans infected with bacterial blight ..... H. R. JACKSON and V. R. WALLEN 961

Genetics of stem rot resistance in rice and virulence in Sclerotium oryzae ..... S. A. FERRIERA and R. K. WEBSTER 968

The relationship of sporulation, sclerotia production, and growth rate to virulence and fitness of Sclerotium oryzae ..... S. A. FERRIERA and R. K. WEBSTER 972

Nitidulid beetles as vectors of Monilinia fructicola in California stone fruits ..... K. G. TATE and J. M. OGAWA 977

Effect of soil pH on susceptibility of peach to Pseudomonas syringae ..... D. J. WEAVER and E. J. WEHUNT 984

Pathogenicity of Phytophthora cactorum isolates from New York apple trees and other sources
H. S. ALDWINCKLE, F. J. POLACH, W. T. MOLIN, and R. C. PEARSON 989

Development and nuclear history of the teliospores of Urocystis colchici ..... R. L. GRAYSON and M. L. LACY 994

Detection of a latent infectious agent that protects against infection by chrysanthemum chlorotic mottle viroid ..... R. K. HORST 1000

Characteristics of Colombian isolates of Pseudomonas solanacearum from tobacco .
G. A. GRANADA and L. SEQUEIRA 1004

Monitoring Erwinia amylovora populations on apple in relation to disease resistance .. T. B. SUTTON and A. L. JONES 1009

Inoculation of Brazilian sour orange seed with an endomycorrhizal fungus . M. J. HATTINGH and J. W. GERDEMANN 1013

Effect of carbofuran treatment on corn yield, maize chlorotic dwarf and maize dwarf mosaic virus diseases, and leafhopper populations ..... C. W. KUHN, M. D. JELLUM, and J. N. ALL 1017

PHYTOPATHOLOGICAL NOTES

Ecofallow reduces stalk rot in grain sorghum .... B. DOUPNIK, JR., M. G. BOOSALIS, G. WICKS, and D. SMIKA 1021

A simple method for determining efficacy and weatherability of fungicides on foliage W. H. KO, H. LIN, and R. K. KUNIMOTO 1023

Effects of Cronartium ribicola on soluble sugars in Pinus monticola bark ..... B. L. WELCH and N. E. MARTIN 1025

A method of quantifying numbers of microsclerotia of Verticillium albo-atrum in cotton plant tissue and in pure culture ..... S. D. TSAI and D. C. ERWIN 1027

Phytophthora stem blight of Cajanus cajan ..... F. J. WILLIAMS, K. S. AMIN, and B. BALDEV 1029

Evaluation of the use of charcoal in the study of soil fungistasis ..... W. H. KO and F. K. HORA 1031

Chromatographic estimation of fungal mass in plant materials ..... L. WU and M. A. STAHMANN 1032

A qualitative method for detecting Xanthomonas campestris in crucifer seed .... N. W. SCHAAD and R. KENDRICK 1034

A medium for enumeration and isolation of Calonectria crotalariae from soil ..... S. C. HWANG and W. H. KO 1036

Compartmentalization of decay associated with Fomes annosus in trunks of Pinus resinosa ..... A. L. SHIGO 1038

Puccinia polysora epidemics on maize associated with cropping practice and genetic homogeneity .... M. C. FUTRELL 1040

Influence of diurnal temperature cycles on infection of cotton bolls by Aspergillus flavus R. G. GILBERT, J. L. MC MEANS, and R. L. MC DONALD 1043

Erratum 1044

No. 10 — OCTOBER

Relationship between glycoalkaloids and disease resistance in potatoes . J. A. FRANK, J. M. WILSON, and R. E. WEBB 1045

Levels of chlorogenic acid in tobacco cultivars, healthy and infected with Thielaviopsis basicola S. K. GAYED and N. ROSA 1049

On exclusion as the mechanism of ozone resistance in virus-infected plants ..... E. BRENNAN 1054

Attempts to use satellite data to detect vegetative damage and alteration caused by air and soil pollutants ..... E. L. FRITZ and S. P. PENNYPACKER 1056

Types of germination and differentiation of vesicles by basidiospores of Cronartium ribicola E. M. HANSEN and R. F. PATTON 1061

Phenylalanine ammonia-lyase, tyrosine ammonia-lyase, and lignin in wheat inoculated with Erysiphe graminis f. sp. tritici ..... N. E. GREEN, L. A. HADWIGER, and S. O. GRAHAM 1071

Histological reactions and effects on position of epidermal nuclei in susceptible and resistant corn inoculated with Helminthosporium maydis race T ..... M. R. CONTRERAS and C. W. BOOTHROYD 1075

Aspartate transcarbamylase activity in healthy and virus-infected cowpea and soybean leaves R. F. LEE, L. B. JOHNSON, and C. L. NIBLETT 1079

Differential inhibitory activity of a corn extract to Erwinia spp. causing soft rot J. R. HARTMAN, A. KELMAN, and C. D. UPPER 1082

Limiting influence of low water potential on the formation of sporangia by Phytophthora drechsleri in soil ..... J. M. DUNIWAY 1089

Factors affecting production and germination of oospores of three Pythium species ..... W. A. AYERS and R. D. LUMSDEN 1094

Influence of soil environment on germinability of constitutively dormant oospores of Pythium ultimum ..... R. D. LUMSDEN and W. A. AYERS 1101

Taxonomic relationships among Typhula species as revealed by mating experiments G. W. BRUEHL, R. MACHTMES, and R. KIYOMOTO 1108

Persistence of pea cotyledons induced by Corynebacterium fascians ..... K. A. ODURO and D. E. MUNNECKE 1114

Heterotic effects of resistance in maize to Helminthosporium maydis race O ..... S. M. LIM 1117

Effects of five acids that occur in pine needles on Fusarium chlamydospore germination in nonsterile soil ..... F. HAMMERSCHLAG and R. G. LINDERMAN 1120

Importance of virus source leaves in vector specificity of barley yellow dwarf virus ... M. J. FOXE and W. F. ROCHOW 1124

Cephalosporium gramineum populations in soil under winter wheat cultivation ..... M. V. WIESE and A. V. RAVENSCROFT 1129

Seasonal transmission of wheat spindle streak mosaic virus ..... J. T. SLYKHUIS 1133

Isozyme patterns in gravity-compensated crown gall tissue ..... P. HANCHEY, B. L. BAKER, and R. BAKER 1136

The effect of detachment on the development of rust disease and the hypersensitive response of wheat leaves infected with Puccinia graminis tritici ..... S. MAYAMA, D. W. REHFELD, and J. M. DALY 1139

Acquisition of Spiroplasma citri through membranes by homopterous insects G. L. RANA, G. H. KALOOSTIAN, G. N. OLDFIELD, A. L. GRANETT, E. C. CALAVAN, H. D. PIERCE, I. M. LEE, and D. J. GUMPF 1143

Inheritance of tolerance to Erwinia carotovora in Florida MH-1 tomato ..... J. A. BARTZ, J. P. CRILL, and C. A. JOHN 1146

Identification of tobacco ringspot virus in Clerodendrum thomsoniae ..... M. A. KHAN and D. P. MAXWELL 1150

Single and double virus infection of soybean: plant characteristics and chemical composition ..... J. W. DEMSKI and M. D. JELLUM 1154

Purification and further characterization of Panicum mosaic virus ..... C. L. NIBLETT and A. Q. PAULSEN 1157

Expression of monogenic chlorotic-lesion resistance to Helminthosporium maydis in corn ..... D. R. SMITH 1160

Hydrogen sulfide: effects on the physiology of rice plants and relation to straighthead disease ..... M. M. JOSHI, I. K. A. IBRAHIM, and J. P. HOLLIS 1165

Biological characteristics of Elsinöe fawcetti pertaining to the epidemiology of sour orange scab ..... J. O. WHITESIDE 1170

Response of Penicillium digitatum strains to benomyl, thiabendazole, and sodium *o*-phenylphenate ..... B. L. WILD and L. E. RIPPON 1176

Effect of soil amendments on hatching of Meloidogyne incognita eggs ..... L. F. JOHNSON and N. B. SHAMIYEH 1178

Flexuous rods and vesicles in leaf and petiole phloem of little-cherry diseased Prunus spp. ..... J. RAINE, M. WEINTRAUB, and B. SCHROEDER 1181

No. 11 — NOVEMBER

Benzimidazole penetration, distribution, and persistence in postharvest-treated pears ..... R. BEN-ARIE 1187

Irreversible recognition demonstrated in the hypersensitive response of oat leaves against the crown rust fungus ..... T. TANI, S. OUCHI, T. ONOE, and N. SAITO 1190

Effect of temperature on rishitin and steroid glycoalkaloid accumulation in potato tuber ..... W. W. CURRIER and J. KUĆ 1194

Temperature coefficients in plant pathology ..... C. E. YARWOOD 1198

Preservation of plant virus antigens by freeze-drying .... D. E. PURCIFULL, S. R. CHRISTIE, and D. L. BATCHELOR 1202

Aminopeptidase profiles of virulent and avirulent Erwinia amylovora and Erwinia herbicola
J. L. MC INTYRE, D. HUBER, J. KUĆ, and E. B. WILLIAMS 1206

The behavior of Fusarium oxysporum f. sp. melonis in the presence and absence of host plants
Z. BANIHASHEMI and D. J. DE ZEEUW 1212

Spread of seed-borne barley stripe mosaic virus and effects of the virus on barley in California ..... S. A. SLACK, R. J. SHEPHERD, and D. H. HALL 1218

Populations of Phytophthora cinnamomi and Pythium spp. under shortleaf and loblolly pines in littleleaf disease sites ..... W. J. OTROSINA and D. H. MARX 1224

Postharvest infection of cottonseed by Rhizopus arrhizus, Aspergillus niger, and Aspergillus flavus ..... J. M. HALLOIN 1229

Selective medium for detection of inoculum of Monilinia spp. on stone fruits ..... D. J. PHILLIPS and J. M. HARVEY 1233

Phoma glomerata, a new pathogen of wheat and triticales, cultivar resistance related to wet period ..... R. M. HOSFORD, JR. 1236

Ozone response of tobacco cultivars unrelated to root system characteristics ..... A. RHOADS and E. BRENNAN 1239

Relationship between leaf roll symptoms and yield in Netted Gem potato
F. R. HARPER, G. A. NELSON, and U. J. PITTMAN 1242

Cephalosporium stripe of winter wheat: infection processes and host response .... D. E. MATHRE and R. H. JOHNSTON 1244

Variation in the aggregation forms of alfalfa mosaic virus strains in different alfalfa organs ..... R. D. WILCOXSON, L. E. B. JOHNSON, and F. I. FROSHEISER 1249

Uptake of the systemic fungicide methyl 2-benzimidazolecarbamate and the fluorescent dye PTS by onion roots ..... C. A. PETERSON and L. V. EDGINGTON 1254

Weathered grain sorghum: natural occurrence of alternariols and storability of the grain ..... L. M. SEITZ, D. B. SAUER, H. E. MOHR, and R. BURROUGHS 1259

Pisatin production in powdery mildewed pea seedlings ..... H. OKU, S. OUCHI, T. SHIRAISHI, and T. BABA 1263

The survival and activity of Phytophthora megasperma in naturally infested soils .... R. G. PRATT and J. E. MITCHELL 1267

Breakdown of resistance to Pseudomonas solanacearum in tomato ..... J. P. KRAUZ and H. D. THURSTON 1272

Ultrastructural changes in pepper cells in an incompatible interaction with Phytophthora infestans ..... D. R. JONES, W. G. GRAHAM, and E. W. B. WARD 1274

The significance of capsidiol induction in pepper fruit during an incompatible interaction with Phytophthora infestans ..... D. R. JONES, C. H. UNWIN, and E. W. B. WARD 1286

Factors affecting bioassay of potato virus S in Chenopodium quinoa ..... C. HIRUKI 1288

Photoperiod influence on the susceptibility of sunflower to Sclerotinia stalk rot ..... R. G. ORELLANA 1293

Stimulation of Geotrichum candidum by low oxygen and high carbon dioxide atmospheres ..... J. M. WELLS and D. H. SPALDING 1299

Influence of relative humidity and red-infrared radiation on violent spore release by Drechslera turcica and other fungi ..... C. M. LEACH 1303

PHYTOPATHOLOGICAL NOTES

Resistance to powdery mildew in tobacco induced by Peronospora tabacina
Y. COHEN, M. REUVENI, and R. G. KENNETH 1313

Relation between qualitative and quantitative resistance in rice blast ... S. H. OU, F. L. NUQUE, and J. M. BANDONG 1315

Relationship between yield loss and area under the wheat stem rust and leaf rust progress curves ..... G. W. BUCHENAU 1317

Movement of penicillin into soybean seeds using dichloromethane ... D. J. ROYSE, M. A. ELLIS, and J. B. SINCLAIR 1319

Heat activation of conidial germination in Periconia circinata ..... L. D. DUNKLE, G. N. ODVODY, and B. A. JONES 1321

Nature and epidemiological significance of infection of bean seed by Whetzelinia sclerotiorum ..... J. R. STEADMAN 1323

Comparison of blotters and guaiacol agar for detection of Helminthosporium oryzae and Trichoconis padwickii in rice seeds ..... M. M. KULIK 1325

Histopathology of blueberry stems naturally infested with Godronia cassandrae ..... D. P. WEINGARTNER and E. J. KLOS 1327

No. 12 — DECEMBER

An unusual new virus, possibly of the potyvirus group, from pepper in Nigeria ..... A. O. LANA, R. M. GILMER, G. F. WILSON, and S. A. SHOYINKA 1329

Interaction of Corynebacterium michiganense and Meloidogyne incognita on tomato ..... R. M. DE MOURA, E. ECHANDI, and N. T. POWELL 1332

An antibacterial compound from Solanum phureja and its role in resistance to bacterial wilt ..... J. C. ZALEWSKI and L. SEQUEIRA 1336

The nature of bean yield reduction by bean yellow and bean common mosaic viruses ..... R. O. HAMPTON 1342

Lack of potato virus S transmission via true seed in Solanum tuberosum ..... R. W. GOTH and R. E. WEBB 1347

Effect of a nonlocalized infection by southern bean mosaic virus on a cell wall glycoprotein from bean leaves ..... W. W. KIMMINS and R. B. BROWN 1350

Factors affecting the occurrence and severity of blackmold of ripe tomato fruit caused by Alternaria alternata ..... R. C. PEARSON and D. H. HALL 1352

Susceptibility of apricot tree pruning wounds to infection by Eutypa armeniacae ..... D. E. RAMOS, W. J. MOLLER, and H. ENGLISH 1359

Production and dispersal of ascospores of Eutypa armeniacae in California ..... D. E. RAMOS, W. J. MOLLER, and H. ENGLISH 1364

Colonization of ergot honeydew by Fusarium heterosporum ..... B. M. CUNFER 1372

Interactions of Pythium myriotylum with several fungi in peanut pod rot ..... R. GARCIA and D. J. MITCHELL 1375

Wilt development in red oak seedlings: a new system for studying oak wilt ..... P. FENN, R. D. DURBIN, and J. E. KUNTZ 1381

Movement of methyl 2-benzimidazolecarbamate into soybean seeds after foliar application of benomyl ..... M. A. ELLIS and J. B. SINCLAIR 1387

Environmental factors affecting brown-spot infection on longleaf pine ..... A. G. KAIS 1389

Mycoflora of pecans treated with heat, low temperatures, or methyl bromide for control of the pecan weevil ..... J. M. WELLS and J. A. PAYNE 1393

Staining reactions of the tissue bordering lesions induced by wounding, tobacco mosaic virus, and tobacco necrosis virus in bean ..... G. FAULKNER and W. C. KIMMINS 1396

Effect of temperature, light, and dew duration on relative numbers of infection structures of Puccinia coronata avenae ..... K. POLITOWSKI and J. A. BROWNING 1400

Development of the stem and crown rust fungi on leaves, sheaths, and peduncles of oats ..... J. K. KOCHMAN and J. F. BROWN 1404

Ultrastructural changes in pepper cells in interactions with Phytophthora capsici (Isolate 18) and Monilinia fructicola ..... D. R. JONES, W. G. GRAHAM, and E. W. B. WARD 1409

Capsidiol induction in pepper fruit during interactions with Phytophthora capsici and Monilinia fructicola ..... D. R. JONES, C. H. UNWIN, and E. W. B. WARD 1417

Residual effect of soil fumigation with vine-burning on control of Verticillium wilt of potato ..... G. D. EASTON, M. E. NAGLE, and D. L. BAILEY 1419

Ontogenetic predisposition of tomato foliage to race 0 of Phytophthora infestans
L. J. DOWLEY, D. G. ROUTLEY, and L. C. PIERCE 1422

Use of safflower seedlings for the detection and isolation of Phytophthora cactorum from soil and its application to population studies ..... Z. BANIHASHEMI and J. E. MITCHELL 1424

PHYTOPATHOLOGICAL NOTES

Sclerotinia sclerotiorum: viability and separation of sclerotia from soil ..... J. S. HOES and H. C. HUANG 1431

Index for 1975 ..... *1*
Errata *20*
Tables of Contents for 1975 ..... *ii*
